Topic: CLARITY-AI: Critical Learning in the Technology Age of AI is a practical, interdisciplinary Blended Intensive Programme (BIP) focused on developing critical thinking skills by comparing human reasoning with AI-supported outputs.

The programme is designed for students from different fields and educational backgrounds and aims to strengthen their ability to analyse problems, formulate and evaluate hypotheses, and take responsible decisions by comparing human reasoning with AI-supported outputs.

A key focus is to provide a theoretical foundation and to create practical contexts for analysis, critical thinking, and problem-solving in areas such as physics, life and social sciences, engineering, drawing, design and 3D printing.

Learning activities are based on problem-based and case-based learning, including scenarios inspired by applied sciences. Students work in international teams through three phases:

- Using only human reasoning
- Using AI-supported inquiry
- Performing a structured comparative and critical analysis

Special emphasis is placed on reflection and metacognition, supported by guided self-reflection tools and group discussions.

Requirements/ Academic background/ Level of studies

1. Students of all cycles of studies
2. Very good knowledge of the English language (B2 language certificate)
